SUMMARY

Junior Data Engineer with 4+ years of experience building scalable data pipelines, AI/ML workflows, and cloud-based analytics solutions using Python, PySpark, SQL, and Azure technologies. Skilled in machine learning model deployment, time-series data processing, and enterprise analytics with expertise supporting operational decision-making and cross-functional data engineering initiatives.

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions **Data Engineer – AI/ML Analytics**

Jan 2026 – Present
Austin, TX (Remote)

- Designed and maintained scalable data pipelines and ML workflows supporting operational analytics and enterprise reporting initiatives.
- Developed Python-based automation and data processing workflows for ingesting, transforming, and validating structured and time-series datasets.
- Built and monitored machine learning workflows including feature engineering, model validation, deployment, and performance tracking across production environments.
- Applied anomaly detection and predictive analytics techniques using Pandas, NumPy, and Scikit-Learn to identify operational trends and data irregularities.
- Collaborated with analysts, engineers, and business stakeholders to deliver actionable insights supporting operational and analytical decision-making.
- Maintained technical documentation for ML pipelines, analytical workflows, and enterprise data engineering processes within Agile environments.

Optum **Data Engineer – Predictive Analytics**

Aug 2024 – Nov 2025
Phoenix, AZ (Remote)

- Engineered SQL and PySpark workflows processing 100K+ healthcare operational records across distributed cloud-based analytical environments.
- Developed end-to-end ML pipelines involving data ingestion, feature engineering, model training, and automated analytical reporting workflows.
- Built predictive analytics and anomaly detection models supporting operational monitoring and enterprise reporting initiatives.
- Applied Spark and Python frameworks for processing large structured and semi-structured datasets across enterprise analytics platforms.
- Supported Azure-based cloud analytics workflows, orchestration processes, and scalable enterprise data engineering operations.
- Collaborated with cross-functional teams to troubleshoot production workflow issues and improve enterprise data reliability and ML performance.

Infosys **Data Engineer – Cloud Analytics**

Apr 2021 – Dec 2023
Hyderabad, India (On-site)

- Developed SQL and Python-based ETL pipelines supporting enterprise reporting, operational analytics, and cloud-based data integration initiatives.
- Built automated workflows for cleansing, aggregating, and validating large structured and semi-structured

datasets using Spark and PySpark.

- Assisted with time-series data analysis, operational reporting, and anomaly detection workflows supporting enterprise analytics initiatives.
- Developed Power BI dashboards and analytical reporting datasets reducing recurring manual reporting effort by 40% across business teams.
- Participated in Agile planning, technical documentation, testing, and production support activities across enterprise analytical environments.
- Collaborated with engineering and analytics teams to deliver scalable cloud-based data processing and operational analytics solutions.

SKILLS

Programming Languages: Python, SQL, PySpark

AI/ML Technologies: Scikit-Learn, Pandas, NumPy, Machine Learning Pipelines, Predictive Analytics, Anomaly Detection

Data Engineering: ETL Pipelines, Workflow Automation, Feature Engineering, Distributed Data Processing, Data Transformation

Big Data Technologies: Apache Spark, PySpark, Hadoop, Structured Data Processing, Time-Series Data Processing

Cloud Platforms: Azure, AWS, Cloud-Based ML Platforms, Orchestration Tools

Analytics & Reporting: Power BI, Tableau, KPI Reporting, Operational Analytics, Data Visualization

Databases: PostgreSQL, MySQL, SQL Server, Relational Database Management

Data Quality & Monitoring: Data Validation, Workflow Monitoring, Root Cause Analysis, Data Integrity Checks

Development Practices: Agile Methodologies, Technical Documentation, Cross-Functional Collaboration, Production Support

CERTIFICATIONS

- Microsoft Certified: Azure AI Fundamentals
- Databricks Certified Data Engineer Associate
- AWS Certified Cloud Practitioner

EDUCATION

University of Alabama at Birmingham, Birmingham, AL
Master of Science in Computer Science

GPA: 3.8/4.0
